

Order Quantity Policy

At Corbin's Flooring Outlet, we strive to ensure your project runs smoothly by providing high-quality flooring solutions. To help you avoid delays or additional expenses, we recommend the following:

1. Quantity Recommendation

It is recommended to order **10-15% more flooring** than your measured area to account for:

- Cutting waste.
 - Pattern matching (if applicable).
 - Additional coverage for mistakes or future repairs.
- Failure to order sufficient material may result in project delays or additional shipping fees.

2. Additional Orders

If additional material is required after your initial purchase, please note:

- Orders **under 800 sqft** are subject to a **shipping charge of up to \$250**.
- Orders of **800 sqft or more** qualify for **free shipping**.

3. Close-Out Products

- Close-out items are discounted products that are no longer restocked once sold out. **If a close-out product is out of stock**, it may not be available for future orders.
- We strongly recommend purchasing **extra flooring (10-15%)** if you are considering a close-out product, as it may be difficult to restock that exact item. Once sold out, **no replacement of the same product at the same price** will be possible.
- If a close-out product becomes unavailable, Corbin's Flooring Outlet will offer a **similar product of equal value** (if available), but the same discount price may not apply.

4. Customer Responsibility

Customers are responsible for accurately measuring their space and ordering the appropriate quantity of flooring. Corbin's Flooring Outlet is not liable for costs incurred due to insufficient material being ordered.

For assistance with measurements or recommendations, please contact us before placing your order.
